RE: ML 47272-BSLS, Access
DOGM Permit #E/039/007

T19S, R2E, SLB&M
Section 16: E2SW4

Dear Mr. Bown,

Trust lands within your mineral lease ML 47272-BSLS are not presently served by a public access road. Access is via a private road through lands within ML 47272A-BSLS and ML 43391-BSLS, with improvements paid and constructed by trust lands mineral lessees Bryce Haas and Jon Young. Before you may use the private access road to conduct mineral operations upon the lands within your mineral lease ML 47272-BSLS you must obtain written permission from Mr. Haas (331 E. 200 So. Lindon, UT 84042), and Mr. Young (2402 Broadview Ct. Sandy, UT 84092.)

Mr. Haas advises that he and Mr. Young are willing to share usage of the road with you for mineral operations if you will share in the construction and maintenance costs of the road. I do not believe this request is unreasonable, since Mr. Haas and Mr. Young have contractual obligations with the Division of Oil, Gas & Mining and the Trust Lands Administration to maintain and reclaim the road.

Alternatively, you may provide notification to the Trust Lands Administration and the Division of Oil, Gas & Mining as per the terms and conditions of your mineral lease, to construct an alternative access into the lands within ML 47272-BSLS.

Please contact me if you have any questions in this matter.

Sincerely,

John T. Blake
Mineral Resources Specialist
